

ROLLEM

ETR DEEP PILE FEEDER

THE CHAMPION ETR, PERFORMING WITH A HIGHER LEVEL OF AUTOMATION, DELIVERS PERFECTLY ACCURATE SCORING, PERFORATING AND SLITTING. ITS DEEP PILE FEED LETS YOU STREAMLINE YOUR PRODUCTION BY ACCEPTING UP TO 30" OF LOADED STOCK AT A TIME.

One operator can confidently perform exact single-pass placement of scores, perfs, slits and make on the fly adjustments to redeem inconsistent press sheets. Fewer wasted sheets means higher profits.

It can also be configured to execute right angle processing by adding a Rollaway unit, and with a vast array of specialty heads available, you'll advance a higher quality finished product to your customers.

The Rollem ETR Deep Pile Feeder processes brochures, inlay cards, double gate folded literature and cross overs on stock ranging from 16 lb. to 20pt. board, always with perfect precision.
