

**Folding & Gluing
Systems**

A detailed close-up photograph of a complex industrial machine, likely a folder-gluer, showing various rollers, gears, and mechanical components. The machine is primarily blue and silver.

**The
Most Profitable,
Capable Folding &
Gluing Systems
Available!**

Chameleon Finishing Systems are ideally suited for Print & Packaging companies looking to move beyond the limitations of traditional legacy systems!

By combining the transport versatility, upper bridge and beam assembly, operator friendly manipulation accessories, and open architecture design of a Chameleon Finishing System, operators have an unsurpassed ability to manipulate product with very few fixed position points to work within.

**MODULAR,
FLEXIBLE,
PRODUCTIVE
100% ACCURATE**

- Pre-Break
- Inserting
- Card affixing
- Batch Kick
- Cold glue
- Hotmelt glue
- Tear Tape
- Bump turn
- Double-side tape
- Window patch
- Auto-lock
- Compression
- Verificaiton
- Inspection

Unmatched

Versatility

Chameleon Systems offer more versatility and converting capability, in a smaller footprint, than any other folding & gluing system available today.

Simple Operation

Chameleon Systems maximize production and improve operator efficiencies with an easy, operator-friendly interface for both system and controls. The solutions are geared toward providing new, cutting edge solutions for converting of direct mail, packaging, retail and fulfillment.

Make-ready efficiency

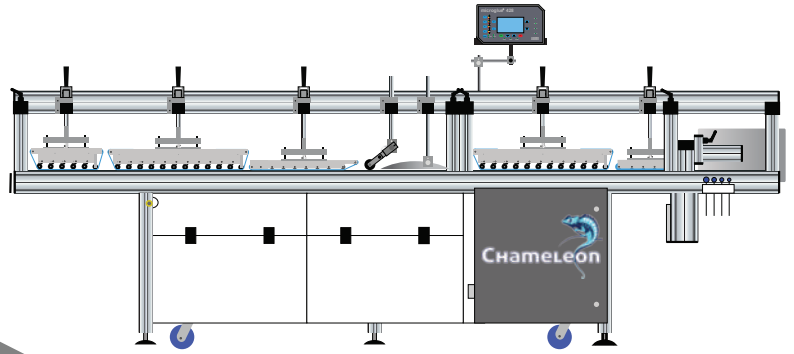

Virtually unmatched in today's competitive marketplace, the combination of the Chameleon's unique make-ready platform and industry leading belt speed provide for quicker setup and faster production speed; making it ideal for both digital and offset finishing.

Uniquely Adaptable

Chameleon Finishing systems are modular in design, allowing for expansion of capabilities at a later date, as well as the ability to add affixing feeders anywhere throughout the system. Capable of running as a stand alone system, or in-line w/ the Insigna die cutting system, the Chameleon can be utilized in multiple production capacities!
